

We are a multidisciplinary image creating freelance collaboration with over a decade of experience in Visual Effects, Software Development, Design and Photography.¹

¹ plus we are nice guys, too.

We are a collaborative of independent media professionals working on asking questions and finding answers.

Coming from as many backgrounds as there are members to the group - ranging from graphic design to software development - we collaborate on projects deploying an interdisciplinary approach. While the majority of our work consists of visual effects projects for feature films and commercials we constantly try to widen our horizons and look for new challenges.

On the next page you can find a selection of our recent projects.

Our current Showreel:
